

RIDE LIKE THE WIND

SkyRide is an attraction like no other. It combines the thrill of a rollercoaster with the activity of a fitness routine no matter what your physical ability is. SkyRides are comfortable & quick; exhilarating & safe. SkyRide is a dream come true from Scott Olson, the founder of Rollerblade® and brings you a customer experience that's as thrilling as it is different – with a sensation of birds flight, as you'll ever experience.

From our SkyRide® Technology ("SRT") headquarters, known as "the Farm," in Minnesota, SkyRide will deliver a customized attraction unique to your property and business.

SRT has unlimited potential, with applications ranging from tourist attractions, fitness clubs, sports facilities, urban environments, parks with beautiful skylines, special needs centers, mountain resort towns and commercial buildings. People need to move and SkyRide moves them without limits!

Scott Olson | Inventor and Founder

SkyRide Human Powered

The Elevated SkyTrack, with patented lane changing ability, allows SkyRiders to move quickly and efficiently around and through any environment without dangerous ground based obstacles.

Rides

Recumbent Bike:

The one that made it all happen and is featured on the Carnival Cruise ship Vista. The easy pedaling, futuristically designed recumbent bike can be engineered for speed or for a leisurely tour around the SkyTrack.

Tandem Recumbent Bike:

Gives you two times the riders for double the throughput. The easy pedaling, futuristically designed recumbent bike for two, can be engineered for speed or for a leisurely tour around the SkyTrack.

Total Body Rower:

Fitness enthusiasts will fall in love with the power and speed that makes rowing the most efficient/effective total body workout a human can perform.

Optional SkyRides

SkyRide Gravity

The Ultimate Experience The Chaser SkyRide series enables you to add thrill, excitement and throughput to your existing SkyTrack.

Chaser:

This ride positions you like a flying superhero and is powered by the force of gravity. You race down the SkyTrack at speeds as fast as you can bomb down the slopes.

Tandem Chaser:

This ride for two, positions both of you like a flying superhero, and is powered by the force of gravity. You race down the SkyTrack at speeds as fast as you can bomb down the slopes.

Recumbent Bike Chaser:

This ride puts you in a recumbent bike position and is powered by the force of gravity. You race down the SkyTrack at speeds as fast as you can bomb down the slopes.

| SkyRide Alpine Chaser | | Why SkyRide? |
|-----------------------|--|--|
| × | | SkyTrack® is high above the ground. No need to look for useable land. |
| × | | Add a second SkyTrack® for 2x capacity or double deck SkyTrack® for 4x capacity. |
| × | | No need to disrupt your landscape. Fly above trees, rocks and valleys. |
| × | | Who wouldn't want to fly? Sitting in a little ground cart is boring. |
| × | | Riders enjoy an aerial perspective versus sitting on the ground looking up. |
| × | | SkyRide® isn't a "me too" ride. It is so unique, guests will come to you. |
| × | | SkyTrack® is enclosed so you can use in all seasons vs. ground track systems. |
| × | | Up to 16x the rider capacity of ground based coasters. |
| × | | Over 10x the revenue compare to ground based coasters. |
| × | | Ability for racing in groups/teams of 2, 4, 8 or 16 |

SkyRide® Electric Assist

Choose your fun & effort level! (beginner • intermediate • advanced)

SkyRide® Mobile

SkyTrack®

Featuring patented lane changing ability, allows SkyRiders to move quickly and efficiently around and through any environment without dangerous ground based obstacles.

SkyRide® Ultralite PeopleMover

Experience SkyRide with a few friends

Loading Zone

Touring with SkyRide Mobile

Because of its Portability, SkyRide Mobile can come to you.

Multi-Lane SkyTrack®

The ASTM track is engineered for durability and safety. It will withstand the elements with minimal care and maintenance. The track offers a quiet, smooth, safe ride.

Safety & Technology

Safety is a core value for SkyRide and carries over from our owner-employees, vendors and our customers. SkyRide uses industry leading safety features that protect riders and the profitability of your investment. Each SkyRide has the most current 5-point safety harnesses, safety belts and Disc brakes to make sure the riders and employees stay safe, secure and happy.

SkyRide features an interactive component you won't find any other coaster, zip line, or thrill ride. Only SkyRide shows the rider their performance such as speed, time, g-force, heart rate, distance, laps.

Electric Assist (Optional)

This interactive electric drive will allow the rider to easily increase or decrease level of speed with very little effort. Electric assist can regulate your throughput and add thrills.

Skyride Seats

SkyRide uses a comfortable, one size fits all seat that will adjust to a riders height. One part of the safety mechanism resides behind the seat tethering the rider to vehicle for an extra level of safety.

Safety Restraint System

The Safety restraint system is ASTM certified and engineered for durability and safety.

Loading Platform

SkyRide uses an elevated loading platform where riders start, finish controlling queue volume.

Collision Avoidance System

Additional safety is engineered into all SkyRides as well as a consistently safe distance between SkyRides.

Dare to be Different!
